

## **An Open Letter from the Director to Young Physicians Why Young Physicians Should Belong to the Mercer County Medical Society?**

**Leadership In Your New Community** - Public Health Protection is not possible without you as a player. Without you as a player there will not be improvement in community, health and educational development. Without you mental health agencies will not progress. Without you communicable disease will not be prevented. Without your help healthy leadership will stop.

**Job Post & Mentoring Programs** – Residents & Fellows aren't the only physicians searching for career placement. Meet a physician member who is willing to share his or her professional experience, wisdom and guidance.

### **Protection:**

- Nurse practitioners want to prescribe drugs and practice independently
- Optometrists want to perform laser surgery
- Physical therapists want to see patients without a referral
- Nurse anesthetists want to practice without an anesthesiologist's supervision

**Reimbursement and Credentialing** - Members receive individualized care. We can use our network of connections to advocate on your behalf. Insurance companies routinely deny covered procedures until we step in to help. Working with the New Jersey Department of Banking and Insurance's Division of Consumer Protection has resulted in successful resolved cases. Medicare problems are quickly addressed thanks to our years of working with the local office. The licensing process in New Jersey takes several months. We are able to speed up the process for members who are scheduled to begin practice. Ask the Medical Staff Coordinators at the Mercer County medical centers about our reputation.

### **Save You Money On:**

- Health insurance discounts
- Practice Management Consulting Services: Latest Revisions on Worker's Comp & Retirement Manuals
- Equipment discounts
- Accounting and marketing discounts
- Fines and penalties – instructions on how to avoid these situations by understanding New Jersey laws

**First Education** - No matter where this asset is listed on the totem pole of benefits it ranks first with us. Education and the ever-changing quest for scientific answers is why you are a physician. Designing great seminars keeps us inspired and connected to you.

**MCMS** knows that Young Physicians are the lifeline that protects the future of medicine. We are the only organization that respects that you alone are qualified to lead patient care. The only other person qualified to give you advise is "The Patient". Membership is

your opportunity to influence changes you'll need as you begin your life as a physician.  
These accomplishments are easier to achieve with friends.
